

How to clean & disinfect

Faucets

1

Use an appropriate Bright Solutions disinfectant that works effectively on hard, non-porous surfaces.

2

Put on your safety glasses and gloves.

3

Apply the product to the entire surface of the faucet, including edges, with a brush, cloth, or sponge until the surface is thoroughly wet.

For spray applications, hold 6-8 inches from the surface.

4

Allow surface to remain wet. See product label instructions for appropriate dwell time.

5

Wipe dry with a clean cloth or allow to air dry.

Recommended: DNA Bathroom Cleaner

Read all product instructions carefully for proper use and maximum effectiveness.
