PRESENTS:

How to clean & disinfect

Food Contact Surfaces

1

Use an appropriate Bright Solutions disinfectant that effectively sanitizes food contact surfaces.

2

Put on your safety glasses and gloves.

3

Pre-clean food contact surfaces using a Bright Solutions dish detergent to remove any gross soils.

4

Rinse surfaces using potable water.

5

Consult product label instructions for proper dilution.

6

Immerse food contact surfaces in diluted solution. See product label instructions for appropriate immersion time.

If surface is too large for immersion see label for spray application instructions.

7

Allow surfaces to air dry. Do not rinse.

8

Prepare a fresh solution daily or when solution is visibly dirty.

**Recommended:
Food Service
Sanitizer**

Read all product instructions carefully for proper use and maximum effectiveness.
